MEMORANDUM

TO: Village Residents

FROM: J. David Yoder, Executive Director

DATE: June 1, 2020

RE: Family Visitors

We have tried to be careful and cautious in our decisions to restore "normal" to our life at Sunnyside Village. Our focus has been on balancing the Governor's Executive Orders with what we perceive to be safe and doable here on campus.

It is this type of environment that we are all living in -- learning better health practices, learning how to relate respectfully with others, and how to live trusting God in ways different than in the past.

After much consideration, effective June 1, we welcome local (within 25 miles) family members to campus to visit Village IL residents with several conditions:

- Family member visitors will be screened and asked their destination at the Checkpoint
 - If the temperature is above 99.6°, the family member visitor will be turned away
- Family member visitors must go directly to the resident's home
- Family members should use the common areas for entering and exiting the building only
- No visitors are permitted in the Health Center or the Manor ALF
- We request that face-coverings or masks be worn in the presence of residents or in common areas
- Guest rooms are not available at this time

We trust this will be a move that expands the groups of persons who can be helpful in our lives. As conditions seem to merit, we will consider making adjustments to our programming here at Sunnyside Village.

Please share this information with your family member visitor before they plan to visit.

Again, thank you for your assistance and cooperation as we learn how to live boldly and compassionately with the virus. May God continue to grant us all the wisdom, peace, and comfort we need during this time.

Thank you!
J. David Yoder
Executive Director
Sunnyside Village
