MEMORANDUM

TO: Sunnyside Village Residents and Staff

FROM: J. David Yoder, Executive Director

DATE: July 24, 2020

RE: COVID-19 Virus Update

We have learned that a staff member tested positive this week. The Department of Health (DOH) has been notified. DOH and CDC guidelines are being followed in addressing this situation. The staff member has quarantined off campus and will remain off campus until cleared to return per CDC and DOH guidelines. Staff or residents that were in contact with the staff member have been contacted per CDC and Department of Health guidelines. The staff member is recovering nicely and doing well.

As part of the DOH process, when a situation like this occurs, the DOH will come to campus next week for a site visit to inspect our procedures, social distancing, wearing of face masks, and other safe practices.

On Monday, July 27, our staff will undergo the third round of testing, which occurs bi-weekly to help manage the Covid-19 issues.

I am sorry to have to deliver this message, but I am grateful for God's oversight and protection as we have journeyed through the coronavirus challenges. We are proactive in addressing this situation and any other cases that may arise.

Feel free to contact me with any additional questions.

J. David Yoder
Executive Director
