MEMORANDUM

TO: Sunnyside Village Residents and Staff

FROM: J. David Yoder, Executive Director

DATE: July 31, 2020

RE: COVID-19 Virus Update

Last week, there was one Village full-time and one part-time staff member that reported positive tests. They are recovering and waiting to return to work as per the CDC and DOH criteria.

Sunnyside staff participates in bi-weekly COVID-19 diagnostic tests. On Monday, July 27, our testing revealed positive results for one Village staff, one Health Services, and one agency aide. We have notified the Department of Health (DOH). We are following the DOH and CDC guidelines in addressing this situation.

All are quarantined and will remain off-campus until cleared to return per CDC and DOH procedures. All residents and staff that may have had any exposure are notified personally per CDC and DOH guidelines.

We are continually grateful for God's oversight and protection as we continue to journey through the coronavirus challenges. We are thankful for all you have been doing to take care of yourselves. We do not control the virus's movements—it is a virus and finds its way to its next target. Together, we are a team—residents and staff alike, and we each contribute by being proactive in carrying out safe practices designed to keep from passing the virus around. May our shared commitment be blessed by our Heavenly Father as we learn to live with these new and unusual circumstances.

Thank you for all your support and help!

J. David Yoder
Executive Director
