Health & Rehabilitation Center and Manor Assisted Living COVID- 19 Update

Note: This information does not apply to residents of the Village residential living.

As of today, we remain with no current positive COVID-19 cases amongst any resident or employees.

All staff will continue to test weekly based on the positivity rate for Sarasota County, and the testing frequency will increase if the positivity rate rises above 10%. Testing is taking place today, Monday, January 11th, for all employees.

Currently, general visitation is available for both the Health Center and the Manor for outdoor and indoor appointments if the resident is not in quarantine. Compassionate visitation continues inside of the Health Center and the Manor by appointment. Salon services are resuming within the Health Center on Tuesday, January 12th.

The Health Center vaccination clinic was completed on Tuesday, December 29th. The next clinic for Dose #2 is scheduled for January 19th. Those that did not have the first dose may have the first dose of the vaccine at the clinic on January 19th. The third clinic is scheduled for February 9th. The Manor vaccination clinic, which had been scheduled for January 24th, has been canceled by the state. We are awaiting updated dates and will share this all soon as we receive the confirmation.

Thank you all for your continued prayers and understanding.

Alex Maliwacki
Director of Health Services
