### **Health & Rehabilitation Center and Manor Assisted Living COVID- 19 Update**

*Note: This information does not apply to residents of the Village Residential Living neighborhood.*

This is our current Health Services Covid-19 update.

CMS has issued a Federal Vaccination Mandate for all staff to be vaccinated by December 5th. We are working with all of our staff members to help provide them the tools and resources to make an educated decision that is best for them. Our mission to serve our residents will remain our priority as we work through this mandate.

We have no positive cases of Covid-19 amongst residents or employees of the Manor or the Health Center.

Testing of residents and staff is based on close contact to a positive case. This means, if a resident had an exposure to a positive individual, they will be tested no sooner than 2 days after exposure and test again 5-7 days after, unless they have had Covid themselves in the prior 90 days. Additionally, all unvaccinated staff is testing one time a week as a result of the transmission rate for Sarasota County, which is “moderate.”

For the Manor and the Health Center, visitation is open. There is no need to schedule an appointment, there is no limitation on the time, duration or number of people coming to visit. Visitation should occur in the resident’s room and not in spaces shared by other residents and/or staff. If you are looking to reserve a common area for a visit such as the outdoor area or an indoor designated area, please call the front desk at extension 0 and this will be based on availability.

If all visitors in your group and the resident are fully vaccinated, you are able to remove your masks once in the residents’ private room, if the resident is agreeable. If all visitors in the group and the resident are fully vaccinated you may also eat with the resident in their room or in a designated private location, if available.

For the Health Center residents, virtual visits can be arranged through activities by calling Ext. 329 or by the link on our website.

For any questions, please contact us.

Alex Maliwacki  
Health Services Administrator
